Fr. Godfrey Nzamajo, PhD, o.p Member, Advisory Board
William E. Begley, Member, Advisory Board

The Natural Solutions Foundation (NSF): An International NGO

(Non Governmental Organization)

Health and Food Freedom: Our First Freedoms
Co-Founded in 2004 by
Maj. Gen .Albert N. Stubblebine III & Rima E. Laibow, MD.

The Mission of the Foundation, which has rapidly become the largest organization of its kind in the world, is to Discover, Develop, Document, Demonstrate and Disseminate natural solutions to the problems facing us and threatening our personal sovereignty, health and food freedom and, indeed, our very DNA itself.

Since its founding in 2004, Natural Solutions Foundation (a 501 c (3) IRS tax exempt organization) has pursued a vigorous program on many fronts, finding natural solutions to significant social problems including personal and larger-scale health, wellness and personal autonomy. We consider promulgating health and food freedom to be an essential part of those solutions. The threats to health and food freedom are both domestic and international, so meaningful solutions must have planetary significance even if activity is local.

NSF understands that health, food and freedom are deeply interlinked in a complex web so that systemic solutions, rather than isolated ones, are necessary to make meaningful change. Health freedom and personal choice for health options, including unimpeded access to information and clean, unadulterated food (which includes nutrient and other wellness products) are closely connected to core problems with global impact.

We consider educational, political and entrepreneurial methods of promulgating health and food freedom to be essential parts of those global solutions.

The Natural Solutions Foundation protects, promotes and defends Advanced Healthcare and Health Freedom from the micro nutrient, to macro political, level.

We know that alone we cannot safeguard our health freedoms. Therefore, NSF is a "network of networks" able to disseminate facts, strategies, tactics, challenges and triumphs in our shared battle to preserve our right to make our own choices based on what WE, ***not*** a government or corporations, believe are the best choices for us.

"Fighting for freedom and warding off tyranny is part of our American, indeed, our human, heritage. We see it as our duty to contribute to the vision of a truly vibrant America and planet. The Natural Solutions Foundation and the campaign to protect us all from threats to health freedom is our way of contributing to our country and our planet."

- Maj. Gen. Albert N. Stubblebine III (US Army, Ret.)

Rima E. Laibow, MD | Maj. Gen. Albert N. Stubblebine III (US Army. Retired) | Ralph Fucetola, JD | Larry Deckerhoff, MIM

THE PROBLEMS

Natural Solutions Foundation

What We Face

Genomicide = Permanent DNA Damage
GMOs, Nuclear Contamination, Vaccines

Privacy Violations
Compulsory Treatments, Medical Privacy, RFID Chipping, Parental Decision-Making

Degraded, Illness-Enhancing Food
Agrochemicals, Fluoride, GMOs, Criminalization of Clean Food Production

Witch Hunts
Practitioner and Device Suppression & Criminalization, Cancer Cures, Raw Milk Use
http://tinyurl.com/rawmilkfreedom

Regulatory Assaults
Nutrients, Herbs, Clean Food, Drug Free Options, Ancient and Modern Advances in Healing, Frequency, Other Novel Devices

Information
Suppression of new medical, health information, technologies

International Harmonization
Codex Alimentarius

All over the world, increasing dependence on non-local resources undermines local autonomy and self sufficiency while increasing dependence on re resources and requirements controlled by corporations and foreign interests. The underlying dominance makes these trends ones which must be reversed if massive population reduction is to be halted.

The UN´s Codex Alimentarius Commission received a Special Report from WHO and FAO stating that most deaths from cancer and other major killers are preventable with appropriate nutrition yet Codex continually undermines the quality of the world food supply.

High-tech medical care and drugs, including chemotherapy, kill more people than natural treatments and rarely work as well as placebo, yet natural treatments are being harried out of existence.

Information supporting natural options and health benefits of food is restricted by government agencies and medical choice is disappearing globally. (HIPPA death, REAL ID, etc.), continuing regulatory assaults on nutrients, wellness products and strategies, including witch hunts against advanced medical practitioners, stifled new medical technologies, "practice guidelines" which straight jackets doctors, forcing them to use dangerous and unnecessary pharmaceutical , accelerating dangerous vaccine mandates and other restrictions and incursions on the health and freedom of us all.

THE SOLUTIONS

Natural Solutions Foundation

What We Do

NATURAL SOLUTIONS FOUNDATION PROTECTS AND DEFENDS LOCAL, REGIONAL HEALTH AND FOOD FREEDOM AND JUSTICE. Active and Registered in the US and other countries, NSF is a not-for-profit 501 c (3) tax exempt organization in the United States and a Registered Private Interest Foundation in the Republic of Panama. We have two agricultural projects in Benin, Africa and are currently looking at projects in South and Central America.

NSF's primary list is nearly 400,000 opt-in supporters strong and, through forwarding, our message regularly reaches many millions of people world-wide.

Making extensive use of the internet and social media, our social and decision-maker ***PUSH BACK*** campaigns have mobilized millions of emails on single issues through our internet-based outreach and education programs. The result has been a series of striking legislative and policy impacts.

Fundamental to our strategy and tactics is the belief that both net-roots and decision-makers must share the same information to bring the wishes of the first and the actions of the second into alignment, often running contrary to the wishes of special interest segments.

NSF creates innovative programs which provide solutions, options and models to the issues we identify as critical. Valley of the Moon™ Eco Demonstration Project (VotM) in Volcan, Chiriquí, Panama, uses safe, advanced technologies to produce pristine food in 3 large teaching and seed propagation greenhouses as well as BeyondOrganic coffee on its teaching farm. VotM shares the techniques involved, runs the only organic restaurant in Central America (complete with professional teaching kitchen), an Advanced HealthCare Medical Tourism Center and is creating a community containing all of the above plus a Hotel, Seminar and Performing Arts Center and a self-contained BeyondOrganic™ Farm and Farm School .

With its global vision and local project development skills, NSF is a uniquely positioned as an uncommonly dynamic purpose-driven organization in a constant state of dynamic, productive evolution.

NSF´s creation of the "Fund for Natural Solutions" with its innovative two part structure will simultaneously generate wealth for investors and funds for critically important "tipping point" ventures chosen for their ability to leverage investment into wide spread changes consistent with the goals and focus of the Foundation AND produce a profit.

Deeply flawed systems like "healthcare" which promotes and manages illness can be replaced by integrated options which promote and stabilize vibrant well being, personal and planetary stewardship, all while rewarding investors. The same profitable opportunities exist in numerous area of NSF focus.

NSF incorporates world class science and wisdom into our programs, in collaboration with outstanding experts and innovators, refining and redesigning our activities to increase striving not only to succeed, but to generalize our knowledge and practices to the widest possible market and community of replication.

CLEAN, GREEN & MEANINGFUL INVESTMENTS

Natural Solutions Foundation

The Fund for Natural Solutions: Why?

Making a Difference While Making a Profit

The Natural Solutions Foundation Trustees
Are Pleased to Announce the Establishment of the

Fund for Natural Solutions
Clean, Green & Meaningful Investments

An investment vehicle domiciled in the Republic of Panama
www.FundForNaturalSolutions.org

The Fund supports ecologically sound, Responsible Development Programs chosen by the Trustees on a Global basis which not only generate a profit, but serve as ¨tipping point¨ catalysts to enhance and expand the aims and goals of the Foundation. Investments and projects are selected with the advice of the Fund's Board of Advisers and Consulting Experts Committee, an international team of seasoned investment experts including fund managers, investment and financial advisers, strategists and sustainable development economists and other experts.

The Fund: Segmented Into Two Approximately Equal Parts: A and B

Part A… Invested through the professional Fund Manager in profit generating, ecologically and socially sound publicly traded companies which meet the requirements of the Trustees, Advisers and Consulting Experts Committee.

Part B… Invested in Natural Solutions Foundation projects and Joint Ventures initiating, supporting or creating opportunities which further the goals and objectives of the Foundation and generate a profit for the investors.

Although Part B is expected to generate significant profits, the Fund Management will seek to generate sufficient revenue on Part A investments to meet the obligations of the fund so that Part B profits will be additive to the Part A profits profile.

Summary of Essential Information about the Fund, with FAQs regarding the Valley of the Moon Eco Demonstration community and the Fund
http://www.healthfreedomusa.org/?p=9763

Natural Solutions Global Objective 2012

The US FDA is the only Non Security US Government Agency whose 2012 budget increased… but this is, in fact, a *military* move: weaponized, industrialized food is a weapon in the war on the health and autonomy of each of us. It is, in fact, a strategic weapon in a weaponized world – http://www.healthfreedomusa.org/?p=9617

The escalating hostility of US FDA and its partner agencies, FTC and USDA, is matched only by the ferocity of the EU (e.g., European Food Supplements Directive 2002/46/EC and European Directive on Traditional Herbal Medicinal Products - Directive 2001/83/EC); all are currently pursuing policies to eliminate both wellness products and access to information about their use.

PROPOSED FUND PURCHASE—PART A

The purchase of an off shore, fully triple-licensed compounding pharmacy offers an outstanding profit center which puts the Health Freedom Team on the commanding heights

Part A Investment: The Fund for Natural Solutions has negotiated the purchase of the only fully licensed Compounding Pharmacy in Panama. A signed Memorandum of Understanding with the owner allows this purchase to move forward rapidly. The owner will continue as Pharmacy Manager after the sale. Equipped with the only Clean Room (Level 100) in Panama, and one of only two in Central America, the Compounding Pharmacy is currently a thriving business poised for substantial growth.

Control and Ownership of the Only Fully Licensed Compounding Pharmacy in Panama Allows the Fund To:

1. Utilize US and European "Compassionate Use" laws allowing bio-identical hormones, for which there is a significant demand, but which have been banned by the FDA to be legally shipped to the US for individual use on the recommendation of a physician. Many other important — and profitable — wellness items are either unavailable, or under attack by the FDA and similar agencies and can be sold the same way

2. Make, sell, import and export the now-banned and increasingly criminalized nutrients, supplements and herbals which the FDA and European Food Supplements Directives have attacked in the US and Europe to other markets en masse, and to the EU and US markets on the ¨Compassionate Use¨ basis

3. Make, sell, import and export intravenous, transdermal, oral and suppository nutrients and wellness compounds which the FDA and European Union are increasingly attacking and banning in the US and Europe under the ¨Compassionate Use¨ laws while opening other markets eager for them

4. Make, sell, import and export any related raw material into and out of Panama in patient size or bulk volume.

5. Register, and thus control within Panama for a minimum period of 5 years, any raw, semi-finished or finished material deemed appropriate by the management of the Compounding Pharmacy

6. Train physicians and others in the use of Compounded Pharmaceuticals and intravenous, transdermal, suppository and other non-pharmaceutical compounds and substances, creating a ready ongoing market for residual income and an expanding market as more doctors learn how to treat medial conditions without drugs, following strong patient demand EXAMPLE: A detailed web-based Johns Hopkins School of Medicine-approved CME Course on Intravenous Nutritional and Chelation Medicine by Foundation Trustee, Rima E Laibow, MD, is now available to train doctors around the world, creating an ongoing specialized market for pre-mixed nutritional IVs made and sold by the Compounding Pharmacy. It is virtually impossible to get materials to mix these IVs anywhere in the world without toxic materials like aluminum in their components: compounded materials will be 100% free of toxic inputs.

7. Make, buy and sell the wellness products, nutrients, herbs, IVs, creams, transdermals and other products which specialty clinics and medical facilities serving medical tourists in Panama and around the world require in order to provide their services to patients but which are so hard for them to source

The current owner and manager of the Compounding Pharmacy has agreed to stay on as management during the transition period to transfer information, contacts, technology, etc. to the Fund and it's appointees. Panamanian Law requires a licensed Panamanian pharmacist to be on staff. That relationship is well-established and stable.

VALLEY OF THE MOON™ Coffee from NSF's Eco Demonstration Project

An Estate Coffee in the Making

Valley of the Moon Coffee™ is shade grown, toxin-free, BeyondOrganic™, Friendly Food Certified© Strictly Hard Bean, Premium High Altitude Gourmet Coffee grown and produced without any toxic chemicals by the Natural Solutions Foundation through its Valley of the Moon™ Eco Demonstration Project in the temperate Chiriquí Highlands of Panama.

After an extensive search for the best location in the world to establish NSF's Eco Demonstration Project, Volcan was chosen and the Project was established to promote and teach sustainable, empowering techniques to all of Panama while creating an affordable, clean and abundant food supply here in Panama as a model.

On NSF's Valley of the Moon' Teaching Coffee Finca (Farm), we have developed pioneering chemical-free techniques, perfected and applied to yield a limited amount of incomparable coffee from one of the finest coffee-growing regions of the world. Available in limited quantities from the protected 25 acre coffee area of our Finca, Valley of the Moon Coffee currently is available to select clientele for $50.00 per pound, plus shipping and handling.

Negotiations are underway to double the coffee production area of the finca and acquire a neighboring property, nearly tripling production. Plans include the construction of a teaching "beneficio" *(coffee production facility)* powered by alternative energy to turn Valley of the Moon Coffee into an "Estate" Coffee, further enhancing its value.

The Fund believes that this "Above Premium Coffee" will serve as a profitable "Flag Ship" product to lead the branding and sale of premium clean, unadulterated food **From the World…...To the World™** .

In a climate in which clean food is increasingly either unavailable or regulated against, despite rapidly increasing consumer demand, this line of development is consistent with the values and purposes of the Fund and the Foundation. We see the creation of Valley of the Moon™ pristine food supply system for export/import to bolster access to clean food worldwide.

BeyondOrganic™ Foods Are *Friendly Food Certified*™

Friendly to the
Consumer Environment Farmer

Friendly Food Certified™ products may not contain, or be produced with, GMO (Genetically Modified Organism) ingredients, synthetic fertilizers, pesticides, fungicides, herbicides, antibiotics or other synthetic substances, radiation or other harmful processes. Environment stewardship and humane conditions for workers and their families are essential
